

The MLX is the most complete standardized presentation system ever developed for the corporate and educational environment. This compelling, handsome, all-in-one system provides everything you need for your classroom and auditorium.

Affordability - Designed to be a self-contained, stand-alone system, the MLX can be deployed and integrated in hours rather than weeks.

Scalability - Designed for a variety of spaces, the MLX can be delivered as a lectern, a teaching station, or an integrated media desk.

Ease-Of-Use - Select and display DVD, VCR, Document Camera, On-board PC (optional), external laptop and auxiliary video input from a single 15" flat panel touch display.

Features

- Self-contained media system housed in a quality lectern or teaching station.
- Route, display and manage images on one or two video displays.
- Full on-screen annotation on top of any image sent to any display.
- On-board visual timer.
- Integrated gooseneck/shotgun microphone.
- Multi-language support for English, Spanish, German and French.
- Customization to support screen control, cable tuner control, lighting control and optional PC selection.
- Assignable functions such as login password protection, automated shutdown procedures and contact information.
- Full diagnostic support including network access and email alerts.
- On-board active help system for all major functions and buttons.
- Minimal power consumption and heat dissipation.
- Minimal cabling for a clean, quick and efficient installation.
- Expert craftsmanship in manufacturing and control system technologies.
- Full documentation includes owner's manual, CAD drawings in PDF form and an interactive training CD.
- ADA options for an additional wireless control panel and a hearing-impaired system.
