

The MDX is a unique furniture solution platform designed to house modern presentation technology. This handsome, versatile piece will surely enhance any room where both the presentation and the presenter are of value.

Functional - The MDX is designed to accommodate up to 24 rack spaces of electronics, drawers, and shelves offering versatile consolidation of fully self-contained presentation equipment and desk storage.

Personalized - The look and feel of the MDX is entirely customizable—you select the materials, colors, and tabletop shape. Best of all the MDX has a typical delivery time of four weeks or less, easily exceeding industry trends.

Reliable - The MDX can change from a desk to a lectern at the push of a button. The user can electronically adjust the height of the desk as well as the tabletop slide position to achieve different configurations to suit different needs. With such open design, the MDX is also an ideal choice for ADA compliant applications.

Features

- Unique compact design provides a sturdy platform while sitting or standing.
- One foot of vertical lift converts the desktop into a lectern allowing for standing presentations.
- Tabletop extends creating up to 18 inches of desk space to sit behind. Without any restrictions below the tabletop this feature creates an excellent solution for ADA requirements.
- Unique cost-effective design minimizes development and delivery time. External skin and tabletop can be delivered separately allowing field integrators more time and access to deploy systems on-site.
- Tabletop shape completely customizable.
- Finishes for both the tabletop and the side skins completely customizable.
- Two rail-lined cavities designed to accommodate up to 12 RU each (specifically designed for the MA 12-space SRS Rack System).
- Overall size and capacity can be custom engineered to provide an infinite number of storage solutions.
